

## We're Growing!

Connectability has been providing IT services in the GTA since 1995, but since June 2014 we've been growing faster than ever before!

In the last 3 years we've gotten to know a lot of businesses in a variety of industries, but one thing remains the same: **EVERYONE NEEDS I.T.**

Based on our growth we're in the process of adding another technician to our team.

We've just begun our search, but you'll have a chance to meet our new technician soon!

If you know any IT field technicians looking for a job with a fast growing IT and Managed Services provider please let us know!

And please be assured that as we grow we will continue to deliver a world-class service experience along with world-class technology support!

## Amazon CEO Jeff Bezos' Secret To Avoiding Email Overwhelm

Do you look at your inbox and want to cry? If so, you're not alone. According to widely cited Radicati Group research, the average person gets 120 business emails every day. If you don't manage your emails, you could end up in another statistical majority. People spend at least 14 percent of their workday on email alone. Is it any wonder that a recent Harris Poll found that only 45 percent of our workdays are spent on actual work? If you're looking for the solution to your email woes, start with some of Silicon Valley's greats.

### BEZOS DELEGATES

If you want to watch a corporate team start to sweat, see what

happens when they get a "?" email from Jeff Bezos. Business Insider reports that the notoriously easy-to-contact Amazon CEO will forward customer complaints to his people and add only a question mark to the original query. Getting that dreaded mark is a little like getting the black spot from Blind Pew the pirate. You know that a day of reckoning is at hand. Follow Bezos' lead. Instead of answering all emails yourself, ask, "Can this be better handled by someone else?" Forward it to your team and save yourself the time.

### USE AUTO REPLIES

You can also use auto-reply tools to manage the flood. Tommy John CEO Tom Patterson did just ➤

that after his emails skyrocketed from 150 to 400 a day. He tells Inc.com that “there weren’t enough minutes in a day to answer all of them.” So he didn’t; he set up an auto-reply to tell people that he only checked email before 9 and after 5 — and to please call or text if it was urgent. The result? “It forced me to delegate and empower others to respond,” he says. Suddenly the flow slowed to a trickle.

### DO YOU GET MORE EMAILS THAN BILL GATES?

And it really should only be a trickle; Bill Gates reports that he only gets 40–50 emails a day. Ask yourself, “Should I really be getting more emails than Bill Gates?” One possible cause for email inundation, according to LinkedIn CEO Jeff Weiner, is other employees sending too much email of their own. He writes, “Two of the people I worked most closely with ended up leaving the organization. Within the span of several weeks after they left I realized my inbox traffic had been reduced by roughly 20–30 percent.” If you

have over-communicators in your ranks, ask them to tone back the digital flood.

### SET BOUNDARIES

Creating a hard buffer between your email and your life is another CEO tactic. Arianna Huffington doesn’t check her email for a half hour after waking or before going to bed, and she never touches it around her kids. That space to breathe is essential to maintaining a work-life balance. And if it gets bad enough? Etsy’s Chad Dickerson has a solution: email bankruptcy! He tells Fast Company that every few years, he just deletes everything and starts fresh!

Not all Silicon Valley gurus have it figured out, however. Apple CEO Tim Cook doesn’t get 120 business emails a day. No, according to an

ABC interview, he gets closer to 700. He just gets up at the crack of dawn every morning and starts reading. Hint Water CEO Kara Goldin does the same thing, preparing for a 12-hour workday with a marathon email session. But as you can tell from the other people we’ve discussed, this is an exception, not the rule. Emulate Jeff Bezos or Arianna Huffington instead and watch your email stress melt away.

## Help Us Out And We'll Give You A Brand-New Samsung Galaxy Tablet For Your Trouble!

We love having you as a customer and, quite honestly, wish we had more like you! So instead of just wishing, we’ve decided to hold a special “refer a friend” event during the month of August.

Simply refer any company with 8 or more computers to our office to receive a FREE Samsung Galaxy A8 Tablet! Once we’ve completed our initial appointment with your referral, we’ll rush YOU a FREE Samsung Tablet, plus an SD card as a thank-you (or donate \$100 to your favorite charity ... your choice!).

Simply call us at **(416) 966-3306** or e-mail us at [referrals@connectability.com](mailto:referrals@connectability.com) with your referral’s name and contact information today!

## Shiny New Gadget Of The Month:

### The Feeder of the Future

Petnet is looking to simplify pet care with their automated SmartFeeder, for pet owners who frequently travel or those with packed, variable schedules.

Install the SmartFeeder app. It'll then ask a few questions to get to know your animal, including their age, weight, activity level, and food type. The feeder will recommend feeding amounts for dozens of common cat and dog foods, though users report it can be finicky.

After it gathers the information, you can set up regular, automatic feeding schedules for your furry friend. After that, it's almost entirely hands-free! Until you need to reload the feeder with your animal's preferred food.

\$150 may be a little steep for most pet owners, but for the busiest, and laziest of us, it could be the perfect addition to your already-automated home.

## Geoff Smart: The 3 Hardest Questions About Your Career

I love helping people strategize about their career. A recently retired governor just contacted me to schedule a career strategy chat. I'm guessing he has a sense of what he wants to do next, but needs a sounding board in order to come up with a plan.

I hope that my approach will not only be useful for him, but also for you. It starts with answering these three hard questions:

**1. What is my skill-will bull's-eye?**  
Your skills (what you can do) and your will (what you want to do) line up in what Randy Street and I call the "skill-will bull's-eye." I recently helped a Fortune 500 VP find hers when she struggled to put her finger on her core talents and interests. Was it head hunting? "No." What about coaching? "I don't think so?" What about designing the process that businesses use to recruit? "YES! That is what I get to do only sometime in my current job. That is what I want to do with more of my time." Presto — a skill-will bull's-eye!

**2. What are three career paths?**  
Force yourself outside the box by outlining three different career options. Following from the previous example, that VP had only previously focused on a corporate path. That was Path 1, so I

asked what were two other paths she could consider. "Well, I guess Path 2 would be to try to join an existing consulting firm ... and Path 3 could be that I hang out my own shingle and do that kind of work solo." We discussed the pros and cons of each path, and she eventually chose Path 2.

**3. Who are 10 people who can help me get my dream job?**

Do you know "hundreds of people?" Great, but let's prioritize the 10 most likely to get you your dream job. Start by listing past bosses who know your work and are well-connected. Now list clients or customers who respect you. Next, add a college friend or two with connections. Then a good recruiter, followed by any powerful family friends you may have. Once you have your 10, write out a half-page message summarizing the career path you're looking for and the reasons you'd be a good fit for that path. End by asking for a few minutes of their time to pick their brain — minutes that will hopefully end in referrals to your dream job.

If you think these tactics are useful, please download our other free career strategy tools at [geoffsmart.com/smarttools](http://geoffsmart.com/smarttools).

## Client Spotlight: Welcome O'Doughs

We'd like to welcome another new customer to the Connectability Family: O'Doughs!

O'Doughs specializes in making delicious and healthy gluten-free baked goods. O'Doughs' products are baked with the all-natural goodness of flax, potato, tapioca, soya and rice flours instead of wheat, barley or rye. Even better, they're certified Non-GMO and Vegan!

Everyone loves baked goods—but often, they don't love us back! That's why O'Doughs bakes a wide variety of healthy, high quality gluten-free products. O'Doughs is O' So Good!

Would you like your company highlighted here in our "Client Spotlight"? Then give us a call today at 416-966-3306.

■ **This Genius Debit Card Lets Parents Control Their Teenagers' Spending** If you feel like your teen views you as a walking ATM machine, startup company Current might be able to help. Their new app — also called Current — allows you to track and control your teen's spending through the company's debit card. Current offers a series of

robust services designed to teach your child financial responsibility while still letting them have some say over how and when they spend their money. You can set up daily spending and withdrawal limits, but you can also set up contingencies — money that's freed up, say, when chores or tasks are completed.

■ **You Won't BELIEVE Where Hackers Are Hiding Malware Now.**

If you use Popcorn Time or VLC, listen up: Hackers are targeting your subtitles. Yes, that's right — from bad kung fu movie dubs to the latest and greatest

European cinema, this technique hides malware in the downloaded subtitle information for a movie. Once it's in your computer it takes root and communicates with the attacker. By the intermission, your machine belongs to them! If you're a Popcorn Time user, you can download the patch online. VLC and other media players should have the problem patched by the time of printing. Or, you know, you could just not download movies from the internet ... but we all know how likely that is.

■ **How a University Campus Is Using This New Technology to Keep Its Students Safe.**

Remember when you got locked out of your dorm building back in college and had to wait for someone to go in or out? Those days may be gone, if new technology out of China has anything to say about it. Dorms at Beijing Normal University are being fitted with face recognition software, which will let residents in — and keep intruders and other unwanted people out.
